e-twinning Project 2026_27

This project aims to motivate our students in Spain and Germany to use the foreign language they have been learning at school in real-life contexts, with peers of similar ages and interests and promoting intercultural communication and European culture within the participating schools. The main participants will be: • The English teachers of IES Herminio Almendros (Almansa, Spain) and their students in 4º ESO (15–16 years old). • The Spanish teachers of the Brecht-Stadtteilschule (Hamburg, Germany) and their students in grades 9 and 10. This is the fourth year of collaboration. During the 2026/27 school year, several aspects will be considered, particularly the digital collaboration between students, the use of TwinSpace as the central platform, and the incorporation of multimodal creative products (comics, podcasts, AI-generated songs, presentations, etc.). • Other teachers: Arts teachers, History, Economics,.... depending on their willingness to join the project or activities.
